

SoySeal Wood Sealer Instructions

Directions for use:

Shake or stir well before using. Spray, roll, or brush an even coating (do not pool) onto clean, dry wood. Prohibit traffic while SoySeal is drying to avoid possible slippage hazard. Applying on a day with low humidity will result in faster drying time. Allow 48 hours dry time. In the event the surface is not completely dry after 72 hours, rinse off excess sealer with water.

Coverage:

One gallon concentrate covers approximately 100-300 sq. feet, depending on porosity of the surface coated and method of application.

This product is designed to seal and waterproof wood products

- Non-Toxic
- Biodegradable
- No V.O.C.s
- Water-Based
- Non-Flammable
- Environmentally Friendly
- Soap & Water Clean-Up
- 24 Month Seal
